How to charge using the RFID Cards For Staff/Fleets

If you have been given an RFID card that looks like the above, it means it is linked to a **Driver Account**. Driver Accounts are given special permission to bypass the payment function of the charge point.

Otherwise, you will need to download the [Charge Assist app](#). Please refer to the "How to Charge as a Member of the Public" information sheet.

To find out which email address your card has been linked to, contact your charge point administrator or the installer.

Using your iCS RFID Card

Step 1

Tap the iCS Card on the symbol shown below.

Step 2

Plug in your car to one of the sockets available. *You may need to press the silver button above the socket to confirm which socket to use.*

Step 3

When charging is complete, tap the iCS card again and unplug your vehicle.
